Task 1: Produce a key like the first task using French words for numbers and colours. You can use numbers up to 15 and extra colours that you research, such as purple or grey. You learnt these during Year 3.

Task 2: Now choose a minimum of 2 images and add the numbers onto the images. Think carefully about what colours will work beside each other.

Task 3: Now colour in your image using your key and the numbered images. Have fun!
