An introduction to prefabricated housing – comprehension

Please answer the questions below. If there is more than one line, you need to give a more detailed answer.

1. Why was there a need for prefabricated housing to be built at the end of World War 2?

2. How many prefabs did Winston Churchill say would be built?

3. How many prefabs were actually built?

4. For how long were people expected to live in prefabs?

5. Why could the sections of each prefab only be 2.3m wide?

6. What made the prefabs more expensive to build than the government had originally anticipated?

7. How deep did a prefabs foundations need to be?

8. What was the quickest recorded time in which a prefab was built?

9. Where were most prefabs built?

10. How do we know that some people still live in prefabs?
